

Unearthing the environmental impact of human activity: A global Co2 emission analysis

Global warming

- ❖ Global warming is the term used to describe the gradual rise in the Earth's average surface temperature. This increase is mostly due to human activity.
 - ❖ Earth's temperature are rising. This is because greenhouse gases(CO₂) can absorb solar heat and stop it from escaping into space.

Measures to control Co2 Emission

- ❖ Use renewable resources
 - ❖ Plant more trees
 - ❖ Bring reusable products
 - ❖ Avoid Plastic waste
 - ❖ Reduce waste
 - ❖ Eat less meat and animal products
-
